The Aurora

The weekly newspaper of Labrador West

Vol 1. No. 41

PUBLISHED IN LABRADOR WEST, WEDNESDAY, JANUARY 14, 1970

Price 10 cents

The first baby of the '70's in Labrador West was born to Mr. and Mrs. George Ellsworth of Wabush, at the Jackman Memorial Hospital, Friday, January 2nd at 7:30 a.m. John Francis weighed in a eight pounds two ounces. The baby boy is the only brother in the family of three girls, Ruth 13, Ann 6 and Debbie aged 3. Mrs. Ellsworth and her son were presented with approximately three hundred dollars in gift certificates, donated by various businesses in the area. As can be seen above Mother and Baby are doing well. Mr. Ellsworth is employed with Wabush Mines - (Aurora Photo).

The youth column by Sharon Bryans

The school term re-opened on Tuesday, January 6th and the opening assembly at the Collegiate was held on Wednesday afternoon, at this assembly the date for the exams was announced by Mr. Swyers. The January exams will begin on the 26th and continue through to the 31st.

The student council had their first meeting of the New Year on Thursday, January 8th., but the attendance was not particularly outstanding. Members of the Student Council were elected by their fellow students to represent them and present their ideas and opinions. So it is the duty of the elected members to attend all meetings, so they will know what is going on. If the young people are going to be this apathetic what is going to happen to the world.

Have you ever noticed that the first thing people read in the newspapers are horoscopes, the comics and the Ann Landers columns? These things have their place in a newspaper which is selling to a wide majority of people but they are not the most important.

I think it is every

citizen's duty to his country to know what is going on

locally and in the rest of the world. If so few people actually bother to read the important news items in a paper, is it any wonder that such a small minority are concerned with the suffering and starvation in our world today, let alone be interested enough to see if they can do anything about it.

Quite a number say to themselves, why should I read that? It does not

concern me. These are the ones who are wrong,

because it is their world just as much as anybody's. The results of tragedies of today will be affecting them tomorrow. They are

showing how little they actually care about themselves when they fail to read and observe and be concerned with current affairs. Some others may say that they do read the papers and they are concerned with the tragedy and wars in the world, but what can they do about it.

I realize that it is impossible for one single human being to stop a war

or feed a starving nation, but by spreading their ideas and opinions on the events of the day they may be able to get enough stirred up to do something about the things they think are wrong. Also every individual can

make the world a better place to live in by being kind and friendly to his neighbour, instead of impatiently honking the horn at the driver in front of you, who may be having

trouble deciding which way to turn at the intersection or whose car is stalled and

refused to start again, wait patiently and remember, patience is a virtue.

Within your own homes you can try to be more understanding and considerate to the other members of your family. Just because you can only get the latest rock on the radio between 11:30 p.m. and 1:00 a.m., doesn't mean that you have to make your parents suffer.

Omens, portents, signs and wonders

by Charles Rendell

A SCALDED CAT DREADS THE FIRE

There is no detailed data to support this contention. Indeed cats love to doze spread out around and beside heat from any source. Anyway it is hard to see how anything as lively as a cat could get scalded, fair play. Unless of course somebody tripped over it while ladelling soup or taking it from the stove. It is reasonable that any cat served this barbarous wouldn't go very much for anything boiling. Cats are even against cold water. Thus there is considerable truth in the above statement as a once scalded cat can be expected to leap high and

to several sides at once at the first sound of anything hissing. LIKE BROODINESS IN HENS, A PERSON'S MOODINESS CAN BE ENDED BY HOLDING HE OR SHE BY THE FEET AND DIPPING THE HEAD IN A BUCKET OF COLD WATER THREE TIMES IN A ROW!

We seem to be labouring the 'water bit' but then this is the very best cure for a hen's broodiness known to man. Goats, cats, and hens are the greatest haters of water, especially cold. Goats have been known to over-exert themselves running for shelter before threatening rain clouds, falling water being the only known agent that can encourage them to do so. They have been so

successful in keeping dry during the years that they have developed and hold disputed title to a most wicked brand of B O that shows no sign of being superceded.

But getting back to the broody hen. We grip her firmly by the legs, up and down, up and down, up and down, at about three second intervals, in goes the squirming head. Put her down after the third ducking and you'd never know she ever pecked anything in her life. Let her go and she flees for dear life, all neck and legs, feathering up constantly to throw off the wet stuff. Of course, now that she's cured of her broodiness, she is also freed of the mother instinct. Thus another hen has to take over the raising of the chicks else they'll all perish by three sundowns. And so while the statement is true it is important that you want to employ it before you do, i.e. with hens. Our evidence has been concerned with egg layers exclusively. Actually there is nothing scientific on human head duckling that leads to any intractable conclusions.

HEAVING A DEAD CAT OVER YOUR LEFT SHOULDER WHILE STANDING STERN ON TO HALF A GALE OF NOR-EAST WIND IS A CURE FOR WARTS.

While I have not tried this

myself there are a number of goodly reports from reliable sources. However if we assume that the charm does work, and we will, it is still a slow process as cats, having nine lives can take a good deal of dying. The 'Nard Easter' is the easiest part of it especially along our East Coast. There, you can have this one wind blowing and raining cold at the same time that a soft Sou-Westerly goes about trying to prove that it is a fine day. Personally I am not very much tore up with charms of any variety. For one thing you got to believe without the teeny weeniest shadow of doubt entering your thoughts, else the most robust of charmings will never work. For Example: One time during school days I asked our old janitor if he would charm away a rather seedy looking wart that had adorned the first joint of the middle finger of my left hand, since before I came down the stairs, or so it seemed. I asked the old man in front of a taunting bunch of disbelieving boys. I told him that I wouldn't believe even if the wart did go away. The wart dried up and blew away in the space of about two weeks and I haven't seen bump nor seed of another since, which simply goes to prove that you got to put all your believin' strength in Charmings. (TO BE CONTINUED).

The Local Improvement District of Labrador City

THE LOCAL IMPROVEMENT DISTRICT OF LABRADOR CITY WILL RECEIVE TENDERS FOR THE PURCHASE OF ONE (1) 1966 FORD VAN, LICENCE NUMBER R 262. THIS VAN MAY BE INSPECTED BY ARRANGEMENT WITH THE TOWN MANAGER'

SEALED TENDERS MARKED "FOR PURCHASE OF VAN" AND ADDRESSED TO A.J. RENDELL, TOWN MANAGER, P.O. BOX No. 280, WILL BE RECEIVED UNTIL THREE P.M. (LOCAL TIME) MONDAY, JANUARY 19TH, 1970. BIDS WILL SHOW PROVINCIAL TAX AS A SEPARATE ITEM. THE HIGHEST, OR ANY BID, WILL NOT NECESSARILY BE ACCEPTED.

TWO representatives of the Polaris Figure Skating Club left by EPA last weekend for St. John's, they were Darleen Turriff and Wendy Caverly, where the Newfoundland Figure Skating Championships took place Saturday, January 10th. This is the first time that the Polaris Figure Skating Club has had skaters eligible to enter the Provincial competition, the club has been active for four years. Accompanying the two skaters, was Allan Davidson, professional figure skating instructor with the club. Also shown she is also freed of the mother instinct. Thus another hen has to take over Club - (Biron Photo).

Minor Hockey Week - January 24 - 31.

On the local scene

CONCERNED OVER TELEGRAPH SITUATION

Tom Burgess, Independent Member of the House of Assembly for Labrador West, has taken a verbal swipe at the Minister of Labrador Affairs and the Members for the Districts of Labrador North and South for their failure to achieve any concrete results with regards to the telegraph situation on the Coast. Mr. Burgess said, "when is someone in authority going to make a statement as to what in hell is happening to the telegraph system that was supposed to be returned to the coastal communities?" This system was phased out last year by The Department of Transport when it was reported that Bell Telephone would take over the operation of the service. "What the people don't want is more talk from people who have been in touch with Ottawa about restoration of the services. The people want action not words," Mr. Burgess said. The Minister of Transport Don Jamieson stated in November that the DOT Telegraph Service, would be restored. So far Cartwright is the only community that has the service restored.

IOCC 1969 Ore Shipments

Ore shipped by the Iron Ore Company of Canada Labrador City and Schefferville was considerably lower in 1969 than the previous year, apparently this was due to the three month long strike that halted production. Shipments reached 12,655,000 tons compared to 16,460,308 in 1968, it had been

hoped that IOC would surpass the 18 million mark in 1969. The total production of ore by IOC was loaded in 419 ships out of Sept Iles. Indications are that things will be much brighter for the coming year, with one and a half million tons to be shipped before the end of January. Optimistically it is anticipated that 20,000,000 tons of ore will be shipped from the Company's dock at Sept Iles, as the \$15,000,000 dock and loaders expansion will soon be in operation, with ships of 150,000 tons and more a common sight at Sept Iles.

WABUSH MINES SHIPMENTS

Wabush Mines operation was also hard hit by the four month strike that paralysed its pelletizing operation at Pointe Noire. Production shipped dropped to 3,300,000 tons as against planned production of 6,000,000. In 1968, 5,480,000 tons of ore were shipped due to the operation of the pelletizer reaching full capacity. The target set for 1968 was 4,900,000 tons. Projected production for this year is 6,000,000 tons which is the maximum production capacity of the operation with its present facilities. The first ship to be loaded in 1970 is due to arrive at Pointe Noire on January 19th.

CHURCHILL FALLS— 2½ YEARS TO DELIVERY DATE

The Churchill Falls Hydro development is now less than two and one half years from its first deliveries of power to its

customers. The project is moving into the 70s on time and within budget, ready for the fourth and largest construction year. Work this year will require an on site force of 6,000 and is expected to exceed this number at the peak of the summer. Thousands more will be employed at work off-site, manufacturing the equipment for the billion dollar development and keeping the

huge undertaking supplied. "There is Company of Canada Employees during the coming year are as follows: March President of Churchill Falls (Labrador) Corporation and the parent company, BRINCO, "that the Churchill development will exert an increasingly important effect on the economy of Newfoundland, Quebec and indeed, of all of Canada during 1970." "Notwithstanding the importance of this contribution

to our economy," Mulholland said, "it is in the long term that Churchill Falls, as a supplier of huge quantities of low cost, inflation proof power, will make its most important contribution to Canada's development. The value of contracts awarded so far now totals 450 million, the greater proportion of this sum is being spent in Canada. Started in 1967, the project is scheduled to begin operation of the first of its 11 generators in 1972 and final completion in 1976.

Quotes & comments

The devil loves to fish in troubled waters.

The church which ceases to be avangelistic will soon cease to be evalgelistical.

Better to suffer for the truth than be rewarded for a lie.

THOUGHTS FOR THE WEEKEND: The sermon that gets only as far as the ear is like a dinner eaten in a dream!

Don't always pray for others and their faults. Ask God to reveal yours to you, in your prayers.

CONFIDENCE

The path ahead I cannot see,
Nor know what it may hold for me
Of sunny days or misty morrows,
Of joys and laughter, sobs
and sorrows;
But Oh! how glad I am to know
That all the way, through weal
or woe,
I'll ne'er take one step alone,
For He who watches o'er His own
Will walk with me in tender love
And lead me to my home, above.

GROWING OLD

A little more tired at the close of the day,
A little less anxious to have our way,
A little less ready to scold and blame,
A little more care for another's name,
And so we are nearing the journey's end,
Where time and eternity meet and blend.

A little less care for bonds and gold,
A little less zest than in days of old,
A broader view and a saner mind,
And a little more love for all mankind,
A little more careful of what we say,
And so we are faring a down the way.

A little more love for the friends of youth,
A little more zeal for establishment truth,
A little more charity in our views,
A little less thirst for the daily news,
And so we are folding our tents away,
And passing in silence at close of day.

DOUBT AND DISCOURAGEMENT

The devil has two master tricks. One is to get us discouraged; then for a time at least we can be of no service to others, and so are defeated. The other is to make us doubt, thus breaking the faith link by which we are bound to Our Father. Look out! Do not be tricked either way.

Gladness! I like to cultivate the spirit of gladness! It puts the soul so in tune again and keeps it in tune, so that Satan is shy of touching it - the cords of the soul become too warm, or too full of heavenly electricity, for his infernal fingers, and he goes off somewhere else! Satan is always very shy of meddling with us when our hearts are full of gladness and joy in the Holy Ghost.

Sadness discolors everything; it leaves all objects charmless; it involves future prospects in darkness; it deprives the soul of all its aspirations, enchains all its powers, and produces a mental paralysis.

Here 'n' there

THE CHECKOFF: Beverly Hill's Fidelity Bank dubs it female tellers "money hostesses" after putting them through a "banking and behavioral boot camp."

CANADIAN WHEAT TO RUSSIA: Canada recently negotiated a contract to sell Russia 3,430,000 tons of wheat, valued at more than \$130 million. This is the remaining portion of a Canadian-Russian wheat deal negotiated in 1966. Shipment of the grain will start immediately, and Canadian officials hope most of these will be completed before the end of the current crop year, next 31 July. It was announced that 73.4 million bushels of wheat would go to Russian ports, of which the equivalent of 9.5 million bushels of wheat in the form of flour would be delivered to Cuba. An official said the delivery program insures a good movement of wheat through Halifax and St. John's, throughout the winter.

MINING EMPLOYMENT: Mining companies in British Columbia recently employed 10,476 workers in 1968. It is estimated that 41,500 workers were supported, directly and indirectly, by the industry in B.C.

SALARY GAINS: The U.S. Labor Dept. recently reported that salaries in a broad range of white-collar occupations rose an average of 5.7% in the year ended last June. That's up from 5.4% in the previous year and the sharpest increase since the survey started in 1961. Auditors fared best; their salaries were up 7.2%. Increases averaged 7% for accountants, 6.2% for engineers and 5.4% for personnel directors. In the clerical field, stenographers' salaries climbed 5.9%, typists 5.7%, and secretaries' 5.3%.

RISE IN FISHING CATCH: The United Nations Food and Agriculture Organization said the world's fishing catch rose to 70 million tons last year up from 66 million tons the previous

year. Japan, Russia, and Norway placed one, two, and three among major fish-catching nations although Peru was ranked first in tonnage with 11.6 million, the value of the Peruvian catch was put at only \$130 million because most of the catch is used for low-cost fishmeal. The organization said the North Atlantic fish yield reached 5.1 million tons up from 4.3 million the previous year.

READING AND WRITING: A story in the New York Times tells of how the director of a now-disbanded Job Corp Center at Camp Kilmer, New Jersey had been buying sex exploitation paperbacks in wholesale lots for the camp. The idea was to help 18 and 19 year-olds improve their reading. Sex was a subject, the camp director explained, that interested the young men, an observation beyond argument. Reasoning logically from this premise and applying the theory that the way to teach a subject is to make it interesting, camp officials came to the conclusion that sexy books would stimulate their interest in learning. So in ordering their textbooks from the wholesaler they passed up the preferred line of "96 Teen-age Classics," although they did buy ten copies of "How to Build a Better Vocabulary." Instead, they used their fund to buy some 16,000 copies of assorted works with less dreary titles. Among them "Male Nymphomaniac," "Call House Madam," "The Girl From Pussycat," "Warm Bed in Reno," and "Teeny-bopper in the CIA," as well as such treasured classics of English literature as "Fanny Hill". An assessment of this learning-aid experiment is not available, since the program has been dropped, but the former director of the camp contends it did improve the reading level and enlarge the vocabulary of the 5,000 young men who had been brought to Camp Kilmer.

PROJECT TO ELIMINATE POLLUTION: Mr. F. Sherman, president and chief executive office of

Dofasco (Dominion Foundries & Steel Ltd.) of Hamilton, Ont., has announced that the major contract on a \$5 million project that will largely eliminate water pollution caused by steel chemicals, had been awarded to Keramchemine Canada Ltd., Work which has already begun on the program will include the conversion of the company's chemicals lines from sulphuric to hydrochloric acid. Steel strip must be cleaned with acid before cold rolling in order to make possible the highly polished finish necessary for making home appliances, automobiles, containers, etc. The project is expected to be completed by the fall of 1971. Mr. Sherman noted that the cost of the project included \$352,000.00 in federal and provincial sales taxes and said that consideration should be given to eliminating such taxes on this type of project since they are undertaken primarily for the benefit of the public and bring little or no return to the shareholder.

FORD ORDER: Ford Motor Company's British subsidiary said it had obtained a 7.2 million dollar order to supply Turkey with trucks and transit vans. Deliveries, spread over nine months, will start this month, a Ford official said.

THE NOISE LEVEL: Workers' eardrums suffer less as U.S. companies keep up noise-control efforts. Borg-Warner says efforts to make its plants quieter have "increased greatly" since 1964. More than 70% of the workers in Monsanto's noisy plants now wear earplugs or earmuffs to safeguard their hearing, the St. Louis based firm reports. Bethlehem Steel will soon add a third full time expert to its noise control staff. In New York, one company, has begun specifying maximum noise levels for new factory equipment it orders. The Auto Workers and other unions also press for safer on-the-job noise levels. But a Monsanto officials complains that some female employees "won't accept earmuffs because it messes up their hair."

Speaking of sports by Jack Drover

CANADA'S WITHDRAWAL

By now everyone is aware that Canada has withdrawn from international hockey competition for this year. By withdrawing Canada gave up the right to host this year's championships which were to be held in Winnipeg and Montreal.

At a meeting of the International Ice Hockey Federation last spring, Canada was given permission by that body to use nine professionals in this year's tournament. This federation is made up of a number of countries who compete in international competition at all levels. Since then the old dictator, Avery Brundage, who has been connected with the Olympics since the horse and buggy days, declared that any team which plays Canada under these conditions is liable to suspension from the 1972 Olympics. The problem here is, that the IHF and the IOC are two separate bodies with the IOC the controlling power, although this power and Mr. Brundage's supreme domination would have been tested if the IHF had held their ground and carried on with the tournament.

Mr. Brundage is determined to keep his Olympics purely amateur, (what ever that is) but how can teams such as the Russians and Czechs whose players make their living directly from playing hockey, be classified as such? From the start the Russians were complaining about the proposed schedule in Montreal and Winnipeg, so much that they even threatened to withdraw, the Russians

moved that the original schedule be adopted for this year's tournament.

The point is that it seems the Russians especially were scared and they controlled the Czech's and East Germany's votes. Canada has since volunteered to check the eligibility of all players in the 1972 Olympics, but you can bet your bottom dollar their offer won't be accepted. The time has come to forget the world amateur championships as there is really no such person of Olympic calibre any longer, instead open all competitions to athletes from all over the world, both pro and amateur alike, thus eventually declaring a truly world championship. Mr. Brundage is a very old man who today is certainly a prime example of the generation gap.

MINOR HOCKEY NEWS

The Pee Wee All Star Team has now been picked and will be leaving for Quebec City on Sunday, February 1st, they will play their first game on Monday at 2 p.m., against Murdochville. The team has recently purchased new helmets, gloves and pants, and plans are underway for the Pee Wee's to play an exhibition game during Minor Hockey Week, January 24th to January 31st.

The Minor Hockey Finance committee and executive currently have two projects underway, in an effort to raise funds for this year's program. The first is a dance at the Ashuanipi on Friday January 23rd. The second is a raffle on a ski-doo, tickets for both can be obtained from any member of the executive.

"B" LEAGUE HOCKEY

Three more games were played in the "B" league last week and the results show the Indians coming on strong with all three teams now having the same number of points. In the three games, the Indians defeated Wabush 4-3 and the Royals 8-0 and in the third, Wabush shut-out the Royals 5-0.

After a scoreless first period Wabush scored 3 goals in the second and two more in the third for their 5-0 victory. John Mercer, Tony Barton, Percy Howlett, Vince White, and Dave Fitzgerald all scored singles with Kev Gillingham registering the shutout. In their 4 to 3 victory, the Indians built up an early 4 to 1 lead and then held on to edge Wabush. Doyle, Wicks, Letourneau and Bludell scored for the Indians while Hollett with 2 and Fitzgerald with a single were the only ones to get the puck past rookie netminder Ed Gear.

Fred Power scored 3 goals to lead the Indians in their bombing of the Royals. Doyle added 2 with Butler, Doran and Fewer scoring one each. Ed Gear stopped 22 shots to register the shutout.

The following is the schedule for this week, Friday, Royals vs Wabush and on Monday January 20th, Indians vs Wabush.

CURLING NEWS

A double-round robin tournament was held at the club recently to determine the representative in the Labrador school boy playoffs held in Goose Bay last weekend. A team skipped by David Dunkin went undefeated in the draw. Other team members are, Gary Butler, Ian Turriff and Vladimir Freudenreich

and if successful this team will go to Grand Falls at the end of the month to compete in the Provincial Play-offs. Meanwhile a draw is presently being held at the club to determine the teams which will represent the Carol Curling Club in the British Consols to be held here later this month.

SKI NEWS

Rene Beauchamp, Eastern Canadian Ski Instructor, was in town again last week and this time held a practical racers and coaches clinic. More races were held over the Holidays and again this past weekend, a number of skiers qualified under the B and C division, on standards set by the CASA. Also last Saturday a ski-off for the younger skiers was held to determine the teams for the newly formed Nancy Greene Ski League.

HERE AND THERE

The Labrador City Hockey League held a meeting on Sunday and made a final attempt to form an "A" League. It is my guess that the meeting was successful and an "A"

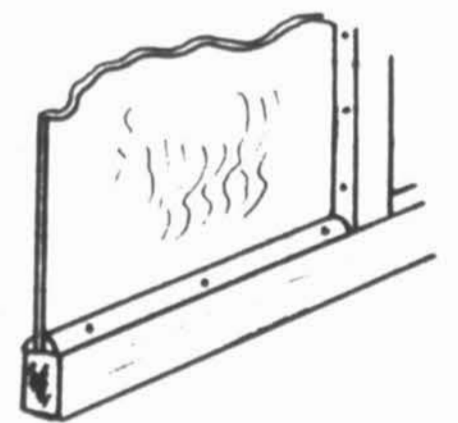

league is now in full swing, again. While in St. John's I saw Gander and St. John's play and I must say the calibre of play was disappointing. I think the teams are losing on the road because their players are only going one way. Jim Mullett played for Gander and was getting plenty of ice time. St. John's is having another mild winter, and over the holidays we were down for 4 rounds of Gold. There is quite a bit of interest around the Island in the big ski meet planned for here in March. Such events are really putting Labrador on the map. The Men's basketball league is scheduled to get underway again, on Wednesday January 14. This week's game only will begin at 9 p.m.

And with the return of Belliveau and Ferguson, Les Canadiens will quickly close the gap on the Rangers. The local hockey league has postponed the drawing for its ski-doo until the end of January.

Tip for the handyman

If one of the panels in your overhead garage door has become damaged, cracked, or rotted, and needs replacing, here's one easy way to do the job. First trim off the edges of the opening in which the new panel is to be fit, smoothing them down flush with the bottom of the old grooves in which the original panel rested. Cut out a new panel from 1/8-inch plywood and set this into the door in some calking compound which you have spread clear around the edges. Then

fasten your new panel securely in place with some quarter-round molding. — (Gene Von).

Mind teaser

If a narrow decorative tape 51 feet long is wound around a flagpole 45 feet high, passing once around it for every 30 inches of the flagpole's height, what is the circumference of the flagpole?

ANSWER

16 inches. Multiply 51 and 45 each by 12 to change to inches; divide 540 by 30 to find number of times the tape winds around the pole; divide 18 into 612 to find length of tape required for each turn around the pole; square this result, and from it subtract the square of 30; extract square root.

NOW ON RADIO - THE GALLOPING GOURMET - The guru of gastronomy, Graham Kerr, gallops into radio with a new series of helpful cooking hints. The Galloping Gourmet, who began on CBC Radio in January, is heard at 9:10 a.m. Monday through Friday. On his five-minute radio show Kerr is every bit as entertaining as he is on his TV series which has had phenomenal success all over the world. If you're looking for menu suggestions, The Galloping Gourmet has the answer.

F. Y. I.

EXCESS WHERE LEAST EXPECTED: The Addiction Research Foundation of Ontario would like to see the price of drink progressively raised to twice the present levels as a measure to combat alcoholism. It is impressed by evidence that alcohol consumption, in that province, tends to fall as prices go up. It estimates that doubling them would bring about a 50% drop in the mortality from cirrhosis of the liver and a 60% reduction in excessive consumption. However the Foundation seems to be forgetting the lessons of the past. Taxes on beer, and especially on wine and liquor, are already so high that doubling prices would almost certainly revive many of the evils of the prohibition era in the U.S. Quite apart from the obvious discrimination against the poor, higher prices would be an open invitation to moonshiners, bootleggers and the underworld to muscle in. Prohibition was a gift to the gangsters; It did not put a stop to drinking.

Scanning the market

BY C.S. DEVINE

As promised in our year end column, we now have the final quotes for our hypothetical (\$10,000.00) Fund. It will be known as Labrador First Investment Fund. The following were our initial purchases and their prices as of 1 January 1970:

QUANTITY:	STOCK:	EXCHANGE:	PRICE	TOTAL
100 Shares	Milton Brick Ltd.	Toronto (Ind).	\$ 6.25	\$ 625.00
100 Shares	Wajax Ltd.	Toronto (Ind).	\$10.25	\$1025.00
200 Shares	Gortrum Mines	Toronto Mines	4.75	950.00
5000 Shares	Peel Resources	Vancouver Mines	.17	850.00
50 Shares	Valley Copper	Vancouver Mines	19.75	987.50
1000 Shares	Revenue Prop.	Montreal O/C.	.87	870.00
100 Shares	Ranger Oil	Toronto Oils	9.90	990.00
200 Shares	United Bata	Vancouver Oils	4.25	850.00
200 Shares	F.A.C.S. Data	Montreal O/C.	3.00	600.00
300 Shares	Sklar Furniture	Toronto O/C.	2.75	825.00
				\$8572.50
	Brokerage Fee			\$177.50
	Cash			\$1250.00
	Total Investment			\$10,000.00

Now a little further information on the above stocks, with their 1968-1969 Highs and Lows.

(1) Milton Brick Ltd. (\$14.25 - \$4.55). This company manufacturers first quality face bricks. Milton Brick, who commenced operations in 1889, has an annual capacity of 30 million bricks. Profits have shown a steady increase in recent years, rising from 16 cents per share in 1963 to 70 cents in 1968. Profits for the first nine months of 1969 were 48 cents as against 47 cents for the like period in 1968. Ratio of assets to liabilities, in their most recent statement, shows an astounding 12 to 1.

The recent sale of a subsidiary, Flemdon Ltd., has added over a million dollars to its already substantial treasury. The availability of these funds for acquisition purposes adds a degree of speculative flavour which could be translated into further growth and profits, in the eventuality of a promising acquisition.

At present the stock pays a dividend of 32 cents per share.

(2) Wajax Ltd., (\$17.00 - \$8.50). Engaged in sale, leasing, rental and servicing of construction and materials handling equipment and in the manufacture and distribution of forest fighting equipment and distribution of G.M. diesel engines. Wajax has nine plants and offices in the U.S. and Canada.

Profits were fairly steady at \$1.00 per share through the late sixties. However for the nine month period ending 30 September, 1969 profits rose to 95 cents a share. Projection for the past year is \$1.25 per share. The dividend paid during 1969 was 34 cents a share.

(3) Gortrum Mines (\$7.05 - \$3.10). Controlled by Northgate Explorations Ltd. This company operates a 1,500 ton per day concentrator at Tipperary, Ireland to produce copper and silver. Early Last summer Gortrum's mercury extraction plant started operations. The company is tax free for 20 years under the Republic of Ireland mining regulations. Profit for the first six months of 1969 was \$1.3 million for 34 cents per share. If this profit rate is continued the company will probably be debt free by 1972, when it is expected a dividend program will be initiated.

(4). Peel Resources (.50 - .15). Controls Sheba Copper Ltd. which has extensive holding in the Highland Valley (Copper) area of British Columbia. Peel has recently raised additional funds through the sale of treasury shares. The steady increase in copper prices has raised hopes that Peel may soon be in a position to bring its subsidiary into production.

(5) Valley Copper (\$29.50 - \$12.00). Controlled by Cominco Ltd., this company has proved reserves of over one billion tons of low grade copper on its 281 claims in the Highland Valley district of B.C. At present copper prices, the properties, if brought into production, have a potential value of over \$50.00 per share, in fact some analysts have placed the figure at \$80.00. A definite decision on production, is expected within six months.

Because of the length of this article, we will conclude our review of the Labrador First Invest Fund's, initial purchases, next week.

Kinsmen president to visit

The President and Founder of the Kinsmen will visit the Labrador West area on January 21st for four days. Mr. Hal Rogers will be accompanied by his wife.

They will arrive by Quebecair that afternoon and will be met at the airport by representatives of the Kinsmen and a motorcade will follow to the Hotel.

Later in the evening the Founder and his wife will be guests at a cocktail party at the Royal Canadian Legion in Wabush.

On Thursday, there will be a tour of both towns with the regular dinner meeting of the Kinsmen that evening.

The next two days will be spent touring the schools in the area and attending various other social functions. Mr. David Humber of Corner Brook, who is the Deputy Governor for Zone 4 will also be in town for the visit.

Mind teaser

The sum of the second and third of three consecutive numbers exceeds 3/4 of the smallest number by 23. What are these three numbers?

ANSWER

16, 17, and 18. Letting X, (X plus 1), and (X plus 2) equal the three numbers, form equation: 2X plus 3 equals 3X/4 plus 23. Solve.

Nearing middle age?

A U.S. management publication lists these ten basic rules for keeping the human memory in good shape:

- (1) INTEND TO REMEMBER. Remembering is largely a matter of motivation; you have to want to remember.
- (2) UNDERSTAND WHAT YOU ARE TRYING TO REMEMBER. Naturally, vague or illogical things are hard to recall.
- (3) ORGANIZE WHAT YOU KNOW INTO MEANINGFUL PATTERNS. It's easier to find what you want in a well kept filing system.
- (4) BECOME GENUINELY INTERESTED IN WHAT YOU WANT TO REMEMBER. An avid hockey fan has no trouble remembering when and where what goals were scored by whom.
- (5) USE AS MANY SENSES AS POSSIBLE. Repeating a name aloud, for example, when you are introduced to someone involves sight, speech and hearing.
- (6) ASSOCIATE WHAT YOU WANT TO REMEMBER WITH WHAT YOU KNOW. Every fact you possess is a hook on which to hang new facts.
- (7) IF YOU CAN'T FIND A LOGICAL ASSOCIATION FOR A NEW FACT, INVENT YOUR OWN, and the wilder the better.
- (8) IF YOU HAVE A GREAT DEAL TO REMEMBER, SPREAD IT OVER A FEW

DAYS if at all possible. The more the memory is "crammed" the more quickly it forgets.

(9) REVIEW WHAT YOU WANT TO REMEMBER. Repetition is essential to an effective memory.

(10) THE BEST TIME TO MEMORIZE IS BEFORE BEDTIME AND IMMEDIATELY AFTER RISING. In this way your mind and subconscious mind will have had undisturbed time to mull it over.

AGE DISCRIMINATION: Recently Ontario has issued guidelines for employers and employees against "age discrimination." Here is a summary of the province's Human Rights Commission's guidelines:

(a) Employers, employment agencies and other agencies acting on behalf of employers, and trade unions are covered by the Ontario Age Discrimination Act.

(b) The Act defines "age" as any age of 40 years or more and less than 65.

(c) The Act does not obligate an employer to hire persons 40 to 65 years of age regardless of ability, qualification and experience. But it does make it unlawful for an employer to refuse to employ, or to restrict terms or conditions of employment, of any person because of age.

(d) The Act does not give persons 40 to 65 years of age any special privilege. It ensures equal opportunity in employment regardless of age, with an individual's qualifications, experience and merit being the sole test for

employment and promotion.

(e) An applicant's age may be asked prior to employment, provided the information is used for legitimate reasons and not to discriminate with regard to age.

(e) Certain designated occupations may be exempted where it can be demonstrated that an age stipulation is vital to normal circumstances of the job. But exemptions may be granted by the Ontario Human Rights Commission only upon written requests from the employer and after hearings.

(f) Job advertisements should be so worded as not to discourage or restrict, directly or indirectly, applicants between the ages of 40 to 65 years. A phrase such as "only applicants between the ages of 25 and 35 years need apply" should be avoided. Other terms and phrases, which could be construed as discriminatory, may be accepted as not contravening the Act if they could reasonably include individuals between 40 and 65: Examples: "recent graduate," trainee". When there is doubt as to the legality of a particular word or phrase, the addition of the phrase, "age no barrier", would generally render it acceptable.

(g) An employer may not refuse to hire an applicant or terminate the employment of an employee merely because he may not be eligible for the employer's pension plan. But the employer is not obliged to include a newly hired older employee in the pension plan.

FROZEN PIPES

One of the best methods of thawing out a frozen water pipe is with an electric iron, because of its concentrated heat. Starting at the faucet end of the frozen pipe, lash the iron to the pipe. Then move it along the pipe away from the faucet as the thawing progresses. If you have copper or brass pipes, the heat from the iron will be effective as far as ten feet from the point of contact. Just exercise a little patience.....and be sure not to let thy hot iron come into contact with any of your woodwork. (Gene Von).

No thought of party promotion until major aims are achieved

Tom Burgess Independent Member of the House of Assembly for Labrador West said recently that reports carried by the news media of his intended speaking tour of Newfoundland, were incorrect.

Mr. Burgess said that the New Labrador Party was started to create an identity for Labrador and to put Labrador on the Map, also to make the other political parties on the Island aware that Labrador does exist, and that "we want attention and services". "Until this is achieved there can be no thought of promotion of a Nfld. and Labrador Party on the Island," he said.

Mr. Burgess stated that when he spoke to Memorial University Students some time ago, he said that, in the interest of good government there should be an effective Opposition party. "With no hard feelings towards the Progressive Conservatives", he said there is not in effect now a good opposition, he continued by saying, in the event that the Liberal Party continues with the same leader, and on the same course as it has done, after the next election which is expected within the next two months, and an effective opposition does not come out of this election, then ideally a new party should be started.

Mr. Burgess concluded by saying the New Labrador Party is now preparing to contest the three ridings in Labrador in the next election.

Reaction to the Honourable W.R. Callahan's statement on the proposed road to connect Labrador West with the Quebec

Highway System, as being unrealistic at this time. Mr. Burgess said that he "did not expect anything less from Mr. Callahan than a reaction of this nature"; some months ago, he said, Mr. Callahan had made another statement on the road link, to the effect that this is not what Newfoundlanders wanted, because Quebecers would pour in and take over jobs in Labrador.

This type of attitude is completely unrealistic and is certainly not befitting a Minister of the Crown. Mr. Burgess suggested that there should be a meeting of the minds, the departments of Highways or Governments of Newfoundland and Quebec should make a realistic assessment of what the building of roads could do for Labrador and Northern Quebec.

The Independent Member also had some comments on the Lake Melville chip mill operation.

He wondered when the thousands of jobs that Premier Smallwood had promised the People of Happy Valley would materialize. He suggested a study of the unemployment situation in Goose Bay to see how many people at the moment are benefiting from this operation.

Mr. Burgess felt that the people of Labrador are not benefitting from this modified operation and he wondered when residents of the Coast were going to be given an opportunity to bid on jobs when they became available.

this week in ASTROLOGY

BY CARL PAYNE TOBEY
ILLUSTRATED BY DEGRAZIA

PAST

MYSTERY OF THE HOPI INDIANS

The Hopi Indians maintain their own history, which bears no relation to the white man's theory of them. Living atop 600-foot, straight-walled mesas, they maintain Oraibi as the oldest continuously inhabited city in the Americas. It is atop Mesa Number Three in northern Arizona. Their story of Creation, beginning with Fire (vital), Earth (physical), Water (emotional) and Air (intellectual) is a surprising parallel to that in Genesis. They were always a peaceful people who survived the invaders. The Hopis still have their own astrology. (Continued.)

FUTURE

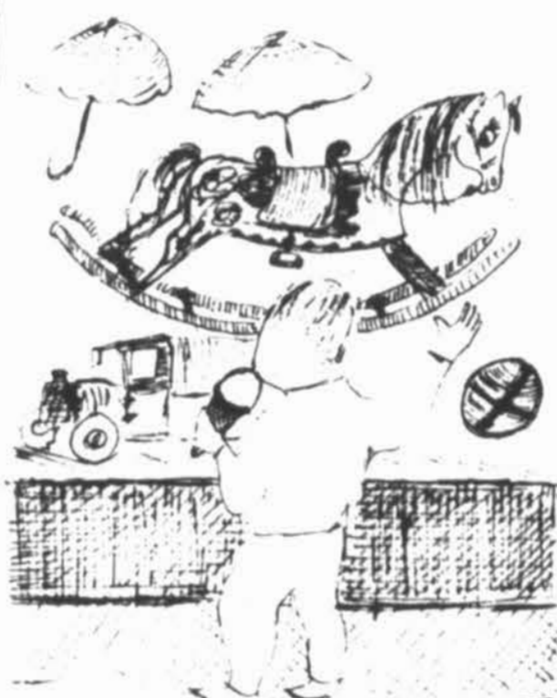

TOBEY'S PREDICTION:

Things should reach a better balance this week. Give them a chance by not disturbing them. The social side of life can have greater vitality. It is a more friendly week. You can learn much if you are alert. Some old concepts and traditions can go through a transformation. People from the past may show up or you may hear from them.

PRESENT

THE LITTLE CANCER BOY

This child is insecure. He wonders what will happen to him if his parents die or go away without him. He needs a lot of love and understanding. He should never be allowed to suffer from neglect. He needs good people around. He wants friends. His sensitivity should never be allowed to harden into fear, for when it does he may steal, and that can become a habit. If given a good chance in life, he will work hard. The birth dates of business men and bankers indicate that more of these boys reach the top than any others.

YOUR WEEK AHEAD

♈ ARIES
Mar. 21-Apr. 19

Communicate or travel on Sunday. Strong social indications but tricky and congested this week.

♉ TAURUS
Apr. 20-May 20

Members of the opposite sex can play a role in your life this week but watch out what you spend on them.

♊ GEMINI
May 21-Jun. 21

Sunday and Monday best days for travel or other activities. Remainder of week may be socially confused.

♋ CANCER
Jun. 22-Jul. 22

Monday through Wednesday in your favor, but avoid committing yourself in any unnecessary way this week.

♌ LEO
Jul. 23-Aug. 22

If you follow a conservative policy, the week should turn out good for you but don't spend carelessly.

♍ VIRGO
Aug. 23-Sep. 22

The days grow more active but next weekend is best for travel and pushing forward with your own ideas.

♎ LIBRA
Sep. 23-Oct. 22

A mixed sort of time. If you allow enthusiasm to run too high, you might encounter disappointments.

♏ SCORPIO
Oct. 23-Nov. 21

A slow pace would be best. Don't do anything foolish socially or where the opposite sex is concerned.

♐ SAGITTARIUS
Nov. 22-Dec. 21

Friends can play a more important role in your affairs. Some of them may be involved with problems.

♑ CAPRICORN
Dec. 22-Jan. 19

Not too auspicious for important action or partnership affairs. Try to keep feelings well balanced.

♒ AQUARIUS
Jan. 20-Feb. 18

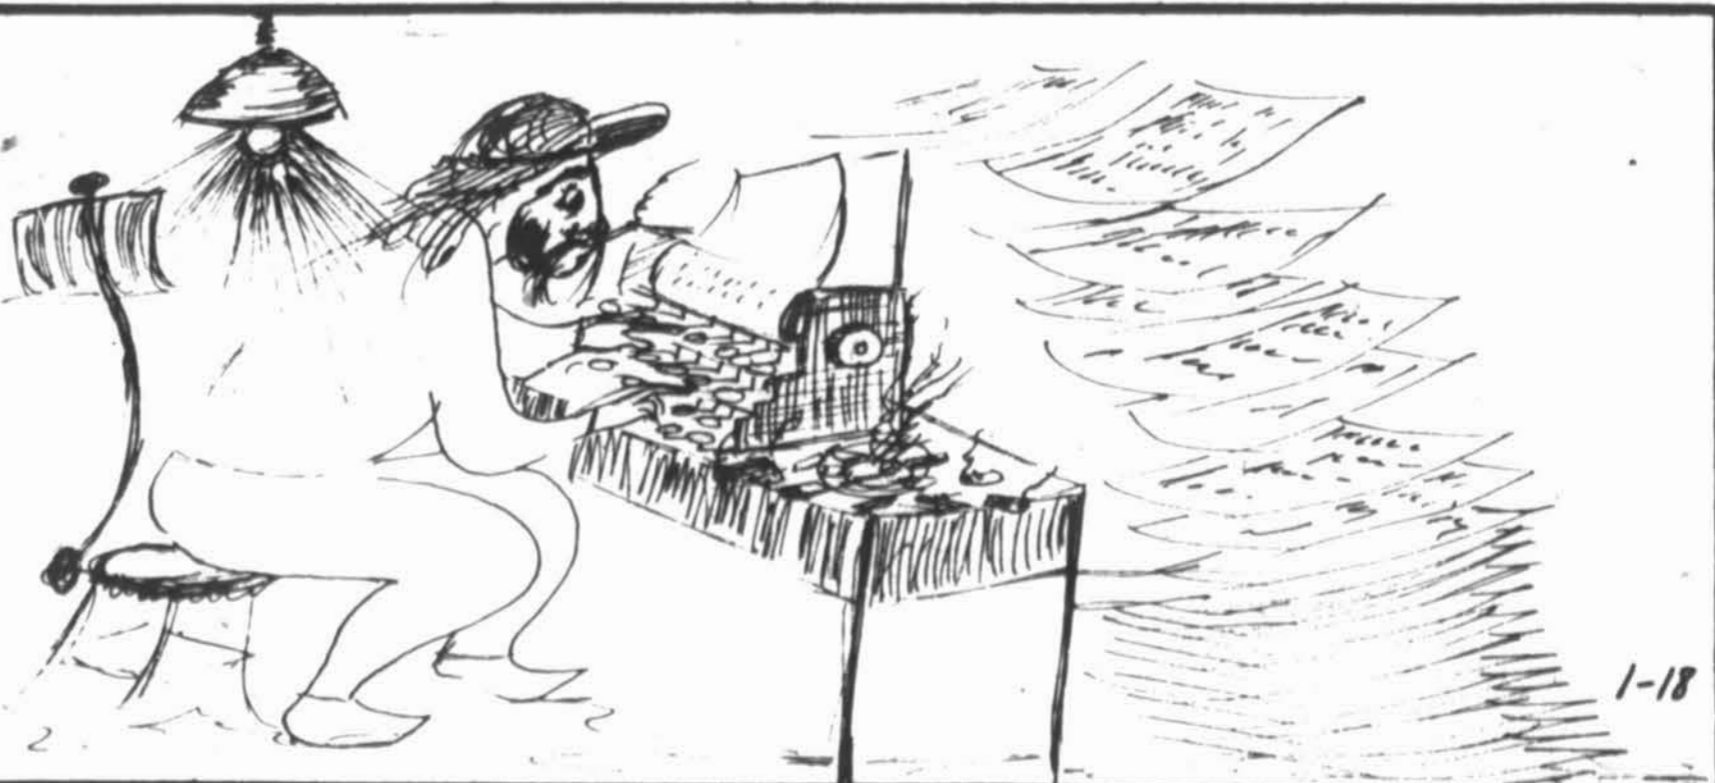

Avoid making social errors. Thursday and Friday are your most doubtful days. Don't attempt the unusual.

♓ PISCES
Feb. 19-Mar. 20

Try to keep your feelings and emotions in good equilibrium. Don't allow spirits to go too high or low.

FIRST OF THE NEW BREED

Aside from inventors, one of the first persons to begin thinking outside orthodox limitations during this century was Pulitzer Prize-winning John J. O'Neill, long science editor of the N.Y. Herald Tribune. When he died Time magazine referred to him as a mystic. And yet his mysticism did not appear in his writings. The time was not ripe. On his own he was investigating astrology, extrasensory perception, strange phenomena, the data of Charles Fort and the writings of psychics, keeping careful records. He will long be remembered by many because he helped them set up laboratory conditions for their experiments.

RCSCC Labrador holds father and son banquet

R.C.S.C.C. Labrador got the Christmas Holiday off to a good start by holding a father and son banquet at the Wabush Legion on December 18. Judging from the reports of those attending, the event was a tremendous success.

Father J. Blouin, O.M.I., said the blessing while the closing grace was said by Rev. W.J. Bellamy.

Apart from a very delicious meal, prepared and served by the Ladies Auxiliary of the Legion, the Corps received greetings from representatives of various groups in the Community.

Commanding Officer, Capt. D.A. MacIntyre, who was the MC, was introduced by the Executive Officer, Lt. R.J. Butler. Capt. MacIntyre introduced each speaker in turn. The first to bring greetings was Mr. Joe Ansara, Chairman of the Wabush Recreation Association, who are sponsors of the Corps.

The next was Mr. Garnet Dunsmore, President of the Wabush Royal Canadian Legion. Although an ex army man himself, Mr. Dunsmore expressed his great regard and respect for the Navy.

Mr. Nels Sherron brought greetings from Wabush Mines, he referred to the History of Military training in Newfoundland, available prior to World War One and since that time.

Speaking to the Cadets on behalf of the Labrador West Intergrated School Board, was Mr. Wm. Taylor, Chairman of the Board. Dr. Jim Hearn then spoke on behalf of the R.C. School Board of Labrador. Cpl. Roulleau represented the Royal Canadian Mounted Police.

Father J. Blouin, brought greetings from the RC Church and wished all present, compliments of the season. Rev.

Wm. Bellamy spoke on behalf of the Protestant Churches and also in his capacity of Scout Commissioner.

Capt. MacIntyre then gave a brief resume of the Sea Cadets of the Wabush, Labrador City Area. Starting in 1963, the corps met in a building attached to the railway station in Labrador City, the group are now sponsored by and meet in the Wabush Recreation Centre. There are at present 31 cadets and five officers. The C.O. emphasized the importance of full attendance because of the tight training program. Capt. MacIntyre informed the gathering that a licence had been received by R.C.S.C.C. Labrador to operate a "Ham" radio station. The Call letters are V02JM, or the voice of the two jolly mariners. This gives the corps the honour of being the only one in Newfoundland and the seventh in Canada to hold a

licence. Lieut. Sacrey, a licenced operator offered to loan and set up his equipment for the use of the corps. The speaker expressed the advantages of such an operation when cadets can discuss problems and ideas with boys all over the world.

Among projects started or in the process of starting, Sea Cadet Bowling, Swimming Awards and Scuba Diving.

During the summer a two week training course was given at Cornwallis, N.S. When a lad passes this course he is qualified as an Able Cadet. Some cadets also get a six week trades training camp, where they can qualify as boatswain, bandsman, etc., Capt. MacIntyre reminded the boys that a one hundred dollar bonus is given at the end of such a course.

Another phase of training is the Corporal Call Out, when a cadet is given the status of Corporal and is paid accordingly. Petty Officer Olmstead, Benefitted from such training last summer and was given a man's job, on a six week cruise from Halifax to the Carribean. Capt. MacIntyre announced that he planned to resign from the

corps next year and would pass command over to Lieut. Butler, but he would be available to help, when and where possible. In his closing remarks the C.O. reminded the boys, that they should think not of what the Sea Cadets can do for them, but what they can do for the Cadets. He said that the Lads not the Officers make the Corps.

Magistrate M. Rowe, the special guest speaker for the evening was then introduced. His theme was, Citizenship, the meaning and qualifications for a good citizen. The Magistrate advised the boys to get the most out of Sea Cadet training and to avail of all the facilities for education. Mr. Rowe's talk, spiced with humorous stories and remarks was most enlightening and enjoyable. Magistrate Rowe was thanked on behalf of the gathering.

Lt. Butler then thanked Capt. MacIntyre for his work with the Sea Cadet movement and expressed thanks on behalf of the Officers and Cadets to the Legion for the use of their building and the Ladies Auxiliary for a very enjoyable meal.

Solve-a-crime

By A.C. GORDON

You gaze reflectively at the bloodstained rear-floor carpet and seat cushion of

the car in which the body of the pretty young blonde secretary, Sharon King, was found this evening. Police examination and removal of

You are the detective

the body has already been performed. You now enter the nearby office building and proceed to the room in which the murder is supposed to have taken place, and here you are introduced by Police Sergeant Joe Morris to Frank Miller, one of the clerks in the office where Sharon had worked, and Kevin Rogers, vice president of the company. It was Miller who had phoned the police about the tragedy.

"She was my girl," Miller exclaims. "Everything was fine with us until Rogers here began making a play for her. He kept needling her for dates, and she kept refusing. It made things very uncomfortable here in the office. Well, right after closing time tonight, I was waiting for Sharon in front of the building. When she didn't show up after about fifteen minutes, I came back to the office. I could hear her and Rogers arguing as I neared the door. I opened the door quietly and peeped in just as Sharon let out a big, terrible scream . . . I saw Rogers plunge the letter opener into her heart! Horrible!

"Rogers, as you can see, outweighs me by at least 60 or 70 pounds, and I knew I couldn't do any good by tackling him. So I ran back down the stairs, hid myself

behind a tree across the street, and waited. It was almost an hour before he came down carrying poor Sharon's body . . . that's when he put it into my car where the police found it. After he left, I ran to the car . . . but it was much too late. She was dead!" Frank Miller breaks into sobs.

"A fine story! A pack of lies!" Kevin Rogers breaks in. "In the first place, Sharon was never Miller's girl. She went out with him a few times originally, but for the past few months she and I had been dating almost steadily. Just because she had tried to be nice to the fellow, he became very proprietary . . . he even followed us a number of times on our dates in his car. Sharon and I had discussed his persistence between ourselves, and were doing our best to handle the matter tactfully. She was a wonderful girl . . ."

"Yes, a wonderful girl," Frank Miller blurts out. "And you had to kill her, and then tried to frame me!"

You look hard at Miller and say, "If there was any framing done, it appears to me that you are the one who tried it. Your story contained a couple of glaring errors!"

Why do you suspect Frank Miller of the murder?

SOLUTION

If the victim's body had been placed in Miller's car almost an hour after she

was murdered, there would have been no bloodstained carpet or cushions in the car — because blood does not flow from a dead body for more than a few minutes. Also, you wonder very much how an innocent witness to such a crime, and especially a person in love with the victim, could wait for more than an hour before calling for help or the police.

Info column

The United Steel Workers of America, Labrador City, will be holding a general monthly meeting on Wednesday, January 14th, in the basement of the R.C. Church.
