MUSIC

Since we have had a yearbook for five years, we have copies of other schools' yearbooks in return for a complimentary copy from us. Also, we have received copies of yearbooks because of our cosmopolitan school population. Some of the countries represented in our school are: West Indies, British Isles, Greece, Portugal, United States, France and Canada.

In these pictures can be seen some of the work involved in producing a yearbook. A dictionary and a good eraser must be at hand at all times. Sometimes a mistake will occur, but we call these typing errors rather than our infallible hands' fault. In the picture on the right one may see that the quality of our yearbooks is improving. The editors hope that this book is another improvement.
